

SPRAY INSTRUCTIONS

Lonarch

Eco-friendly herbicide

PLUS

Cleargreen SCT Surfactant

SPRAY INSTRUCTIONS

Pour desired amount of water into your sprayer and add Lonarch and Cleargreen per the following guidelines:

- 8 oz Lonarch + 1 ounce of Cleargreen - for all weeds (brush, vines, broadleaf, waxy, dense, taller than 6")
- 6 oz Lonarch + 2/3 oz Cleargreen - for grass 3" to 6" in height
- 4 oz Lonarch + 1/2 oz Cleargreen - for grass 2" or less in height

Adjust the spray nozzle to fan, cone or mist setting. If edging, you can adjust sprayer nozzle to a jet or stream and spray in a line along the desired area to edge. After spraying, rinse out the nozzle of sprayer (if metal) with clear water to prevent corrosion.

When to Use

- For best results, do NOT use below 60 degrees.
- Apply when air is calm to avoid drift and hold spray nozzle close to target.
- Lonarch + Cleargreen is rain-fast in 10 minutes.
- Area may be replanted 24 hours after spraying.

KEY TAKEAWAYS

These instructions have been carefully written to ensure success. As you become familiar with the product, you may find you can dial the mix back for certain types of weeds/brush.

These products together are a non-selective contact herbicide with a systemic action; therefore, it will kill whatever it is sprayed on.

NOTE: Neither the manufacturers or Dishman Distribution are responsible for any damage due to misuse of these products.
