

Cleargreen™

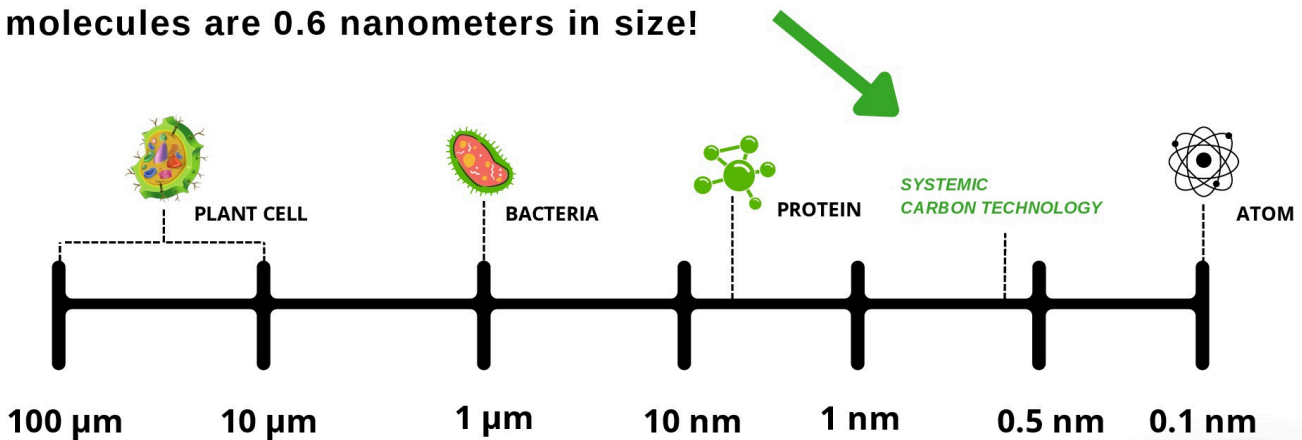

NATURE MEETS NANOTECH

THE SCIENCE

SYSTEMIC CARBON TECH®

Traditional surfactants are one-dimensional. Our unique nano carbon formula is systemic. Imagine positively charged nutrient molecules bonding with negatively charged nano carbon to hitch a ride into the plant. This is how our product maximizes nutrient delivery and uptake.

SCT Carbon can enter plant cell structures because its nano carbon molecules are 0.6 nanometers in size!

*nm - nanometer
 μm - micrometer
1,000 nm = 1 μm*
